

CENTER YOURSELF

Imagine you're an interior designer staging a home, and you want furniture and other household goods to look symmetrical and organized—such as centering a couch against a wall, placing photos on a partition, or hanging a mirror. Well...you'll going to need a good (and potentially long) tape measurer, a pencil, and a partner to help you mark the wall.

Or you can simply use a

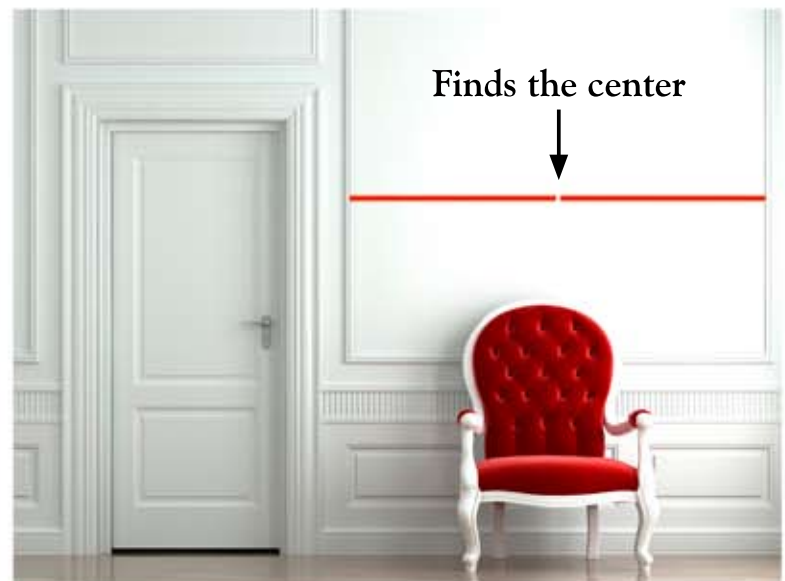

CENTRAX™

The Centrax™ identifies the middle point on a laser-generated line projected onto a surface. It can also identify quartiles if you're trying to spread multiple items equally across an area.

Great for:

- Interior Designers
- Real Estate Agents
- Carpenters
- Art Galleries
- Handymen
- Any Home Owner!

Find your center with the Centrax™!
